

CASA ÁLVAREZ, In its commitment to protecting the environment, it decides to be certified by AENOR according to the UNE-EN ISO 14001: 2015 standard. The implementation of this system in the organization will help to annually improve our environmental performance by establishing a series of improvement objectives.

Below is information on the efforts made by CASA ÁLVAREZ during 2020 and 2021:

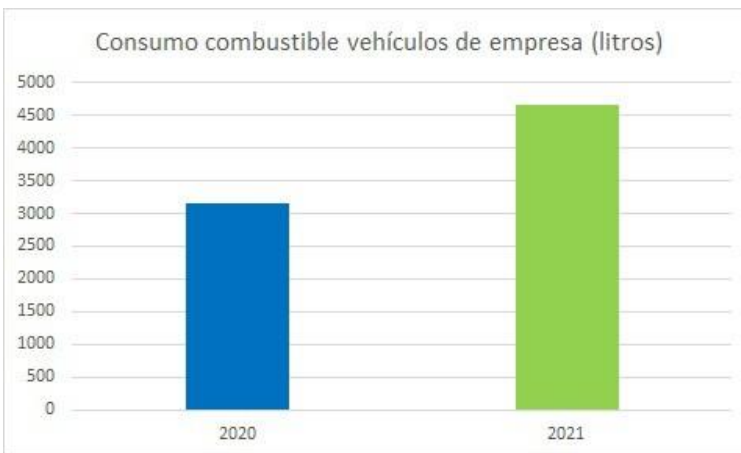

RESOURCES USED

ELECTRICAL ENERGY CONSUMPTION OFFICES OF CASA ÁLVAREZ

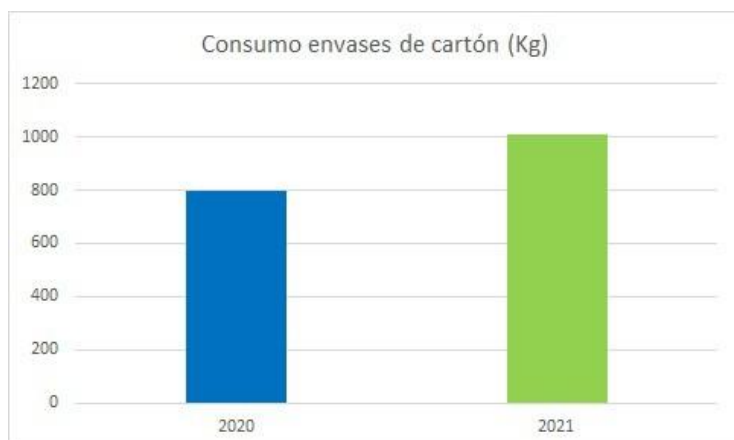

Although at the moment we do not have the entire year 2021 to compare, if we compare the first half of 2020 with that of 2021, there has been an increase in electricity consumption of 60.98% kWh / worker. This is due to the fact that the health emergency situation generated in March 2020 did not work from the office and in 2021 it did.

FUEL CONSUMPTION COMPANY VEHICLES

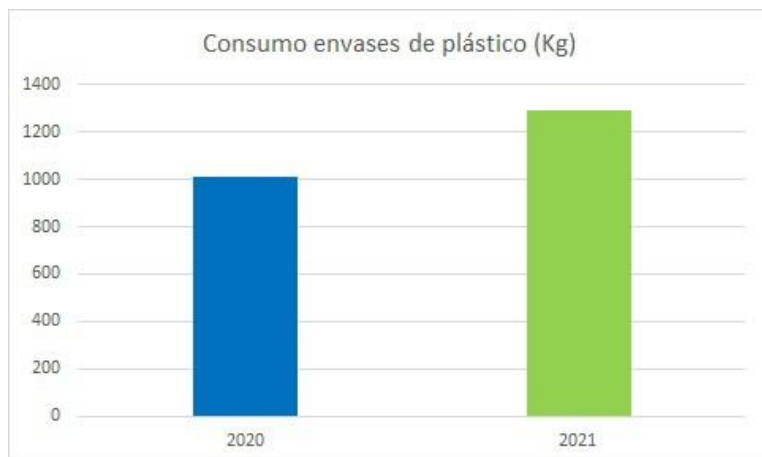

Although at the moment we do not have the entire year 2021 to compare, if we compare the first half of 2020 with that of 2021, there has been an increase in fuel consumption of 48.06% liters. This is due to the fact that once the emergency situation produced in March 2020 had passed, the displacements of company vehicles have increased.

CONSUMPTION OF CARDBOARD PACKAGING

During 2020, the company began accounting for the kg of cardboard packaging marketed during 2019. Now we continue with accounting for 2021.

CONSUMPTION OF PLASTIC CONTAINERS

During 2020, the company began accounting for the kg of plastic packaging marketed during 2019. Now we continue with accounting for 2021.

CASA ÁLVAREZ, In order to minimize its impact on the environment, the following improvement objectives will be carried out during this year 2021:

Maintain environmental / sustainable management in the organization with the certification of the company in the UNE-EN ISO 14001: 2015 standard

Incorporate 5% recyclable cardboard for the cardboard packaging of the filing line products (Biopsies and preparations).
